SL- FT-1A | Sulphonated asphalt

Product Description

FT-1A is a proved drilling fluid additives which can be widely applied in various mud system. It is the polymer that has high water soluble content and oil soluble content. It has a good property to inhibit and reduce hthp fluid loss. The typical concentration is 1-3%

Features

- It can reduce hthp fluid loss efficiently.
- It can improve mud cake quality and inhibit clay being dispersed.
- It has a good heat stability up to 180°C
- It has a good property to resist salt, calcium and magnesium.
- It can be applied in fresh water, seawater, and saturated salt water mud system.

Packing and Storage

It should be packaged in a triple sack with the lined bag. The net weight of each sack is 25kg. They shall be stored in a shady, dry, and ventilated place.

Safety Precautions

They shall be avoided contact with eyes, skins and clothes, otherwise flush it with water. Handling methods and dangerous data shall be referred to MSDS.
