SL-ASI-OC Oil Sludge Scale Inhibitor is a very effective agent to keep the oil sludge system from forming scale in refinery, it is suitable for coking and incrustation in oil sludge pipeline, heat exchanger, and it can get rid of scale already formed; improve the efficiency of the heat exchanger to allow the stable operation of the system. It can also prolong the operation cycle.

### Technical Indicators

### Distinguishing Features

1. The product has good dispersivity, can effectively avoid the accumulation of catalytic agent powder, corrosion product and salt, etc. suspending in the oil sludge, to control the increase and deposition of the grain in the sludge.

2. It has anti-oxidizing property, can form inertia molecule with the oxidized free hydroxyl group and can stop polymerization caused by oxygen.

3. It has metal passivation property, can form stable coordination compound with metal ion, and then stop or reduce the dehydrogenation and oxidation reaction of catalyst.

4. It has the feature of corrosion resistance and surface modification.

### Using Method

1. The product shall be added at the sludge extraction opening.

2. The quantity shall be 200-400ppm in the first application, after one week, it shall be changed to 50-100ppm.

3. Should be added continuously in order to get the best effect while application.

### Caution

This product should be stored at aeration-drying, shady and cool places.

During the process of the application, the customer should choose the best service conditions according to the actual case of the factory.

Because the conditions of use of this product are beyond the seller's control, the product is sold without warranty either express or implied and upon condition that purchaser make its own test to determine the suitability for purchaser's application. Purchaser assumes all risk of use and handling of this product. This product will be replaced if defective in manufacture or packaging or if damaged. Except for such replacement, seller is not liable for any damages caused by this product or its use. The statements and recommendations made herein are believed to be accurate. No guarantee of their accuracy is made, however.
Packing and Storage

1. Product is packed in galvanized barrels, with net weight of 170kg/barrel.
2. Stored in cool dry places, kept away from fire, handled with care.
