SL-LDF-D Low-Silicon Defoamer

Product Description

SL-LDF-D low-silicon defoamer is used for delayed coking unit, it can lower the foaming height of the coke Unit to prolong the coke-forming time; reduce the coke-powder entrainment to protect cold exchange equipment and radiant pump; reduce the coke-powder entrainment of the gasoline and diesel oil to lessen coke-powd sediment at the volatilization line and the bottom of the dephlegmator, in order to keep the production cycle long and safe.

Technical Indicators

</tbody>
</table>

Distinguishing Features

1. The product have the characteristics of less dosage, long life, stable chemical composition.
2. The speed of defoaming is fast and the process of inhibiting foam is long.
3. The product is very safe and never cause corrosion to metal parts.

Using Method

1. It should be diluted with 4 times diesel oil; it is added into the coke tower from the top of the coke tower.
2. The injecting amount should be around 80~100ppm.
3. It should be added by pump continuously.

Caution

1. During the process of the transportation and storage, you should place it carefully, pay attention to fire, and avoid strong sunshine.
2. During the process of the application, the customer should choose the best service conditions according to the actual case of the factory.

Because the conditions of use of this product are beyond the seller's control, the product is sold without warranty either express or implied and upon condition that purchaser make its own test to determine the suitability for purchaser's application. Purchaser assumes all risk of use and handling of this product. This product will be replaced if defective in manufacture or packaging or if damaged. Except for such replacement, seller is not liable for any damages caused by this product or its use. The statements and recommendations made herein are believed to be accurate. No guarantee of their accuracy is made, however.
Packing and Storage

Packing: Contained in a plastic bucket and the net weight/bucket is 200±2kg.

Storage: In the environmental temperature, airtight and dry conditions.
